

# **Safety Test Report**

Report No.:AGC04094180504ES01

**PRODUCT DESIGNATION**: Wireless charging set

BRAND NAME : N/A

MODEL NAME : P324.61

CLIENT : Xindao B.V.

**DATE OF ISSUE** : June. 01, 2018

**STANDARD(S)** : EN 60950-1:2006+A11:2009+A1:2010+A12:2011+A2:2013

**REPORT VERSION**: V1.0

Attestation of Global Compliance (Shenzhen) Co., Ltd.

## **CAUTION:**

This report shall not be reproduced except in full without the written permission of the test laboratory and shall not be quoted out of context.

The results spowford this jest report refer only to the sample(s) tested unless otherwise stated and the sample(s) are retained for 30 days only. The document is issued by AGC, this document cannot be reproduced except in full with our prior written permission. The more details and the authenticity of the report will be confirmed at attp://www.agc.gett.com.

#### General remarks

This report shall not be reproduced except in full without the written approval of the testing laboratory.

The test results presented in this report relate only to the item tested.

"(See remark #)" refers to a remark appended to the report.

"(See appended table)" refers to a table appended to the report.

Throughout this report a comma is used as the decimal separator.

#### **General product information**

The product is used for charging mobile or similar information technology equipment.

The product is intend to supply by USB port that considered to comply with the LPS and SELV requirment of this standard; Therefore the product's circuit considered as Class III of SELV.

Instructions and equipment marking related to safety is applied in the language that is acceptable in the country in which the equipment is to be sold.

The product was submitted and tested for use at the manufacturer's recommended ambient temperature (Tma) of 40°C.

#### **Summary of testing**

The test item passed.

#### Copy of marking plates

The artwork below may be only a draft. The use of certification marks on a product must be authorized by the respective NCBs that own these marks.

## Wireless charging set

Model: P324.61 Input: 5V === 2A

Output: 5W

Xindao B.V.

P.O. Box 3082, 2280 GB, Rijswijk, The

Netherlands

Importer: XXXXXXXX

Address: XXXXXXXX Made In China

#### Remark:

- 1) The CE marking and WEEE symbol (if any) should be at least 5mm and 7mm respectively in height.
- 2) The markings and instructions are the minimum requirements required by safety standard. For final production samples, the additional markings which do not give rise to misunderstanding may be added.
- 3) As declared by the applicant, the importer (and manufacturer, if it is different)'s name, registered trade name or mark and the postal address will be marked on the products before being place on the market.
- 4) Marking on the packaging or in a document accompanying the electrical equipment is only acceptable if it is not possible to place such markings on the product.

The results spound this jest report refer only to the sample(s) tested unless otherwise stated and the sample(s) are retained for 30 days only. The document is issued by XOC, this document cannot be reproduced except in full with our prior written permission. The more details and the authenticity of the report will be confirmed at attp://www.ago.go.tt.com.

(A12.2011)	Delete NOTE Z1 and the addition for Portable Sound System. Add the following clause and annex to the existing standard and amendments.	The state of the s	The North Colonia Committee		
	Zx Protection against excessive sound pressure from person	nal music players			
	Zx.1 General This sub-clause specifies requirements for protection against excessive sound pressure from personal music players that are closely coupled to the ear. It also specifies requirements for earphones and headphones intended for use with personal music players.	O B. T. J. B. M.	N		
	<ul> <li>A personal music player is a portable equipmentfor personal use, that:</li> <li>is designed to allow the user to listen to recorded or broadcast sound or video; and</li> <li>primarily uses headphones or earphones that can be worn in or on or around the ears;</li> <li>allows the user to walk around while in use.</li> </ul>		K C		

	EN 60950-1				
Clause	Requirement – Test	Result – Remark	Verdict		
KA JUL Na Compliance ® St.	NOTE 1 Examples are hand-held or body-worn portable CD players, MP3 audio players, mobile phones with MP3 type features, PDA's or similar equipment.	NGC	N		
	A personal music player and earphones or headphones intended to be used with personal music players shall comply with the requirements of this sub-clause.	E THE THE PROPERTY OF THE PARTY	Attr. attor of Colonia Committee		
	The requirements in this sub-clause are valid for music or video mode only.				
	<ul> <li>The requirements do not apply:</li> <li>while the personal music player is connected to an external amplifier; or</li> <li>while the headphones or earphones are not used.</li> <li>NOTE 2 An external amplifier is an amplifier which is not part of the personal music player or the listening device, but which is intended to play the music as a standalone music player.</li> </ul>				
	The requirements do not apply to:     hearing aid equipment and professionalequipment;     NOTE 3 Professional equipment is equipment sold through special sales channels. All products sold through normal electronics stores are considered not to be professional equipment.     - analogue personal music players (personal music players without any kind of digitalprocessing of the sound signal) that are brought to the market before the end of 2015.     NOTE 4 This exemption has been allowed because this technology is falling out of use and it is expected that within a few years it will no longer exist. This exemption will not be extended to other technologies.		A THE STATE OF THE		
	For equipment which is clearly designed or intended for use by young children, the limits of EN 71-1 apply.	SGC ***	P.C.		
GG AMERICAN AND AND AND AND AND AND AND AND AND A	<ul> <li>Zx.2 Equipment requirements</li> <li>No safety provision is required for equipment that complies with the following: <ul> <li>equipment provided as a package (personal music player with its listening device), wherethe acoustic output LAeq,T is ≤ 85 dBA measured while playing the fixed"programme simulation noise" as described in EN 50332-1; and</li> <li>a personal music player provided with an analogue electrical output socket for a listening device, where the electrical output is ≤ 27 mV measured as described in EN 50332-2, while playing the fixed "programme simulation noise" as described in EN 50332-1.</li> </ul> </li> <li>NOTE 1 Wherever the term acoustic output is used in this clause, the 30 s A-weighted equivalent sound pressure level LAeq,T is meant. See also Zx.5 and Annex Zx.</li> </ul>		S A S A S A S A S A S A S A S A S A S A		

EN 60950-1				
Clause	Requirement – Test	Result – Remark	Verdict	
O SE	All other equipment shall:  a) protect the user from unintentional acoustic outputs exceeding those mentionedabove; and b) have a standard acoustic output level not exceeding those	NGC :	N N	
	mentioned above, andautomatically return to an output level not exceeding those mentioned above when thepower is switched off; and	A The state of the	The support colors	
	<ul> <li>c) provide a means to actively inform the user of theincreased sound pressure when the equipment is operated with an acoustic output exceeding those mentioned above. Any</li> </ul>			
	means used shall be acknowledged by the user before activating a mode of operation which allows for an acoustic output exceeding those mentioned above. The acknowledgement does not need to be repeated more than		C American	
	once every 20 h of cumulative listening time; and NOTE 2 Examples of means include visual or audible signals. Action from the user is always required.	S T TE THE	K James Same	
	NOTE 3 The 20 h listening time is the accumulative listening time, independent how often and how long the personal music player has been switched off.		Poc	
	<ul> <li>d) have a warning as specified in Zx.3; and</li> <li>e) not exceed the following:</li> <li>1) equipment provided as a package (player with Its listening device), the acoustic output shall be ≤ 100 dBA measured while playing the fixed "programme simulation noise" described in EN 50332-1; and</li> </ul>		S. F. T. K.	
	2) a personal music player provided with an analogue electrical output socket for a listening device, the electrical output shall be ≤ 150 mV measured as described in EN 50332-2, while playing the fixed "programme simulation noise" described in EN 50332-1.			
	For music where the average sound pressure (long term LAeq,T) measured over the duration of the song is lower than the average produced by the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA.	NG NAME OF THE PARTY OF THE PAR	The state of the s	
	In this case T becomes the duration of the song.  NOTE 4 Classical music typically has an average sound pressure (long term LAeq,T) which is much lower than the average programme simulation noise. Therefore, if the player is capable to analyse the song and compare it with the programme simulation	AGC	PC SEE	
	noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA.	CC FEET TO E	CC	
	For example, if the player is set with the programme simulation noise to 85 dBA, but the average music level of the song is only 65 dBA, there is no need to give a warning or ask an acknowledgement as long as the average sound level of the song is not above the basic limit of 85 dBA.	Fall Market	The state of the s
