| Test item description | : | Wireless charger Bluetooth speaker |
| Trade Mark | : | -- |
| Manufacturer | : | Ningbo Cstar Imp&Exp CO., LTD |
| Model/Type reference | : | SL240 |
| Ratings | : | Input: 5V⎓, 1.5A, output: 5V⎓, 0.8A |

**Copy of marking plate**

**Wireless charger Bluetooth speaker**
Model No.: SL240
Input: 5V⎓, 1.5A,
output: 5V⎓, 0.8A

Made in China

Importer name: XXXX
Importer address: XXXX

**Remark: the marking for other models is same as above except model name.**

| | |
|---|---|
| **Test item particulars** : | |
| Equipment mobility : | [x] movable [] hand-held [] transportable<br>[] stationary [] for building-in [] direct plug-in |
| Connection to the mains : | [] pluggable equipment [] type A [] type B<br>[] permanent connection<br>[] detachable power supply cord<br>[] non-detachable power supply cord<br>[x] not directly connected to the mains |
| Operating condition : | [x] continuous<br>[] rated operating / resting time: |
| Access location : | [x] operator accessible<br>[] restricted access location |
| Over voltage category (OVC) : | [] OVC I [x] OVC II [] OVC III [] OVC IV<br>[] other: |
| Mains supply tolerance (%) or absolute mains supply values : | No direct connection with mains |
| Tested for IT power systems : | [] Yes [x] No |
| IT testing, phase-phase voltage (V) : | N/A |
| Class of equipment : | [] Class I [] Class II [x] Class III<br>[] Not classified |
| Considered current rating of protective device as part of the building installation (A) : | |
| Pollution degree (PD) : | [] PD 1 [x] PD 2 [] PD 3 |
| IP protection class : | IPX0 |
| Altitude during operation (m) : | < 2000 m |
| Altitude of test laboratory (m) : | Shenzhen of China < 2000 m |
| Mass of equipment (kg) : | 0.1kg |
| **Possible test case verdicts:** | |
| - test case does not apply to the test object : | N/A |
| - test object does meet the requirement : | P (Pass) |
| - test object does not meet the requirement : | F (Fail) |
| **Testing** : | |
| Date of receipt of test item : | 2018-07-10 |
| Date(s) of performance of tests : | 2018-07-10 To 2018-07-18 |

**General remarks:**

1."（see remark #）" refers to a remark appended to the report.

2. Throughout this report a point is used as the decimal separator.

3. The test results presented in this report relate only to the object tested.

4. This report shall not be reproduced except in full without the written approval of the Shenzhen TOBY.

**Summary of testing:**

Tests performed (name of test and test clause):
The sample(s) tested complies with the requirements of IEC/EN 60950-1

These tests fulfill the requirements of standard ISO/IEC 17025.

When determining the test conclusion, the Measurement Uncertainty of test has been considered.

The EN 60950-1 approved LPS external power supply (rating: 5Vdc, 1.5A max.) should be used which is not considered in this report.

The cell of battery package was certified by UL 1642 (see the component list for detail information)

Heating test (4.5):

Tma =50℃(Declared by manufacturer)

K-type thermal couple used for temperature measurement.

**General product information:**

Wireless charger Bluetooth speaker, powered by External power supply.

All tests were carried out on model SL240. All models are identical except for the appearance, color and model name.

The product has been tested according to standard EN 60950-1: 2006+A11: 2009+A1: 2010 +A12:2011+A2:2013 and those deviations taken into account of CENELEC common modifications.

| 1.7.4 | Supply voltage adjustment : | | N |

| IEC 60950-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| | Methods and means of adjustment; reference to installation instructions : | | N |
| 1.7.5 | Power outlets on the equipment : | | N |
| 1.7.6 | Fuse identification (marking, special fusing characteristics, cross-reference) : | | N |
| 1.7.7 | Wiring terminals | | N |
| 1.7.7.1 | Protective earthing and bonding terminals : | | N |
| 1.7.7.2 | Terminals for a.c. mains supply conductors | Not directly connected to main supply | N |
| 1.7.7.3 | Terminals for d.c. mains supply conductors | | N |
| 1.7.8 | Controls and indicators | | N |
| 1.7.8.1 | Identification, location and marking : | | N |
| 1.7.8.2 | Colours : | | N |
| 1.7.8.3 | Symbols according to IEC 60417: | | N |
| 1.7.8.4 | Markings using figures : | | N |
| 1.7.9 | Isolation of multiple power sources : | | N |
| 1.7.10 | Thermostats and other regulating devices : | | N |
| 1.7.11 | Durability | The label was subjected to the permanence of marking test. The label was rubbed with cloth soaked with water for 15 s and then again for 15 s with the cloth soaked with petroleum spirit. After this test there was no damage to the label. The marking on the label did not fade. There was no curling nor lifting of the label edge. | P |
| 1.7.12 | Removable parts | There is do not give rise to misunderstanding. | N |
| 1.7.13 | Replaceable batteries : | Same model for battery only. | P |
| | Language(s) : | English | -- |
| 1.7.14 | Equipment for restricted access locations: | EUT is not considered for exclusive usage in restricted access locations. | N |
| 2 | PROTECTION FROM HAZARDS | | P |
| 2.1 | Protection from electric shock and energy hazards | | N |

| IEC 60950-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 2.1.1 | Protection in operator access areas | Not directly connected to main supply<br>Approved external adapter was used when charging. | N |
| 2.1.1.1 | Access to energized parts | | N |
| | Test by inspection : | | N |
| | Test with test finger (Figure 2A) : | | N |
| | Test with test pin (Figure 2B) : | | N |
| | Test with test probe (Figure 2C) : | | N |
| 2.1.1.2 | Battery compartments | | N |
| 2.1.1.3 | Access to ELV wiring | | N |
| | Working voltage (Vpeak or Vrms); minimum distance through insulation (mm) | | -- |
| 2.1.1.4 | Access to hazardous voltage circuit wiring | | N |
| 2.1.1.5 | Energy hazards: | Approved internal Li-ion battery cell was used | P |
| 2.1.1.6 | Manual controls | | N |
| 2.1.1.7 | Discharge of capacitors in equipment | | N |
| | Measured voltage (V); time-constant (s) : | | -- |
| 2.1.1.8 | Energy hazards – d.c. mains supply | | N |
| | a) Capacitor connected to the d.c. mains supply : | | N |
| | b) Internal battery connected to the d.c. mains supply : | | N |
| 2.1.1.9 | Audio amplifiers : | | N |
| 2.1.2 | Protection in service access areas | | N |
| 2.1.3 | Protection in restricted access locations | | N |
| 2.2 | SELV circuits | | P |
| 2.2.1 | General requirements | | P |
| 2.2.2 | Voltages under normal conditions (V) : | < 60 V d.c | P |
| 2.2.3 | Voltages under fault conditions (V) : | < 60 V d.c | P |
| 2.2.4 | Connection of SELV circuits to other circuits : | SELV circuits only | N |

| IEC 60950-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 2.3 | TNV circuits | | N |
| 2.3.1 | Limits | No TNV circuits | N |
| | Type of TNV circuits: | | -- |
| 2.3.2 | Separation from other circuits and from accessible parts | | N |
| 2.3.2.1 | General requirements | | N |
| 2.3.2.2 | Protection by basic insulation | | N |
| 2.3.2.3 | Protection by earthing | | N |
| 2.3.2.4 | Protection by other constructions : | | N |
| 2.3.3 | Separation from hazardous voltages | | N |
| | Insulation employed: | | -- |
| 2.3.4 | Connection of TNV circuits to other circuits | | N |
| | Insulation employed: | | -- |
| 2.3.5 | Test for operating voltages generated externally | | N |
| 2.4 | Limited current circuits | | N |
| 2.4.1 | General requirements | | N |
| 2.4.2 | Limit values | | N |
| | Frequency (Hz) : | | -- |
| | Measured current (mA): | | -- |
| | Measured voltage (V): | | -- |
| | Measured circuit capacitance (nF or µF) : | | -- |
| 2.4.3 | Connection of limited current circuits to other circuits | | N |
| 2.5 | Limited power sources | | N |
| | a) Inherently limited output | | N |
| | b) Impedance limited output | | N |
| | c) Regulating network limited output under normal operating and single fault condition | | N |
| | d) Overcurrent protective device limited output | | N |

| IEC 60950-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| | Max. output voltage (V), max. output current (A), max. apparent power (VA): | See appended table 2.5 | -- |
| | Current rating of overcurrent protective device (A) | Not used | -- |
| 2.6 | Provisions for earthing and bonding | | N |
| 2.6.1 | Protective earthing | | N |
| 2.6.2 | Functional earthing | | N |
| 2.6.3 | Protective earthing and protective bonding conductors | | N |
| 2.6.3.1 | General | | N |
| 2.6.3.2 | Size of protective earthing conductors | | N |
| | Rated current (A), cross-sectional area (mm2), AWG: | | -- |
| 2.6.3.3 | Size of protective bonding conductors | | N |
| | Rated current (A), cross-sectional area (mm2), AWG: | | -- |
| 2.6.3.4 | Resistance of earthing conductors and their terminations; resistance (Ω), voltage drop (V), test current (A), duration (min): | | N |
| 2.6.3.5 | Colour of insulation: | | N |
| 2.6.4 | Terminals | | N |
| 2.6.4.1 | General | | N |
| 2.6.4.2 | Protective earthing and bonding terminals | | N |
| | Rated current (A), type, nominal thread diameter (mm) : | | -- |
| 2.6.4.3 | Separation of the protective earthing conductor from protective bonding conductors | | N |
| 2.6.5 | Integrity of protective earthing | | N |
| 2.6.5.1 | Interconnection of equipment | | N |
| 2.6.5.2 | Components in protective earthing conductors and protective bonding conductors | | N |
| 2.6.5.3 | Disconnection of protective earth | | N |
| 2.6.5.4 | Parts that can be removed by an operator | | N |
| 2.6.5.5 | Parts removed during servicing | | N |
| 2.6.5.6 | Corrosion resistance | | N |
| 2.6.5.7 | Screws for protective bonding | | N |

| IEC 60950-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| 2.6.5.8 | Reliance on telecommunication network or cable distribution system | | N |
| 2.7 | Overcurrent and earth fault protection in primary circuits | | N |
| 2.7.1 | Basic requirements | Not directly connected to main supply<br>Approved external adapter was used when charging. | N |
| | Instructions when protection relies on building installation | | N |
| 2.7.2 | Faults not simulated in 5.3.7 | | N |
| 2.7.3 | Short-circuit backup protection | | N |

| | **Zx Protection against excessive sound pressure from personal music players** | | N/A |

| IEC 60950-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |
| | **IEC 60950-1, GROUP DIFFERENCES (CENELEC common modifications EN)** | | |
| | **Zx.1 General**<br>This sub-clause specifies requirements for protection against excessive sound pressure from personal music players that are closely coupled to the ear. It also specifies requirements for earphones and headphones intended for use with personal music players.<br><br>A personal music player is a portable equipment for personal use, that:<br>is designed to allow the user to listen to recorded or broadcast sound or video; and<br>primarily uses headphones or earphones that can be worn in or on or around the ears; and<br>allows the user to walk around while in use.<br>NOTE 1 Examples are hand-held or body-worn portable CD players, MP3 audio players, mobile phones with MP3 type features, PDA's or similar equipment.<br><br>A personal music player and earphones or headphones intended to be used with personal music players shall comply with the requirements of this sub-clause.<br><br>The requirements in this sub-clause are valid for music or video mode only.<br><br>The requirements do not apply:<br>while the personal music player is connected to an external amplifier; or<br>while the headphones or earphones are not used.<br>NOTE 2 An external amplifier is an amplifier which is not part of the personal music player or the listening device, but which is intended to play the music as a standalone music player.<br><br>The requirements do not apply to:<br>hearing aid equipment and professional equipment;<br>NOTE 3 Professional equipment is equipment sold through special sales channels. All products sold through normal electronics stores are considered not to be professional equipment. | | N/A |

| IEC 60950-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |

| IEC 60950-1, GROUP DIFFERENCES (CENELEC common modifications EN) | | | |
|---|---|---|---|
| | analogue personal music players (personal music players without any kind of digital processing of the sound signal) that are brought to the market before the end of 2015.<br>NOTE 4 This exemption has been allowed because this technology is falling out of use and it is expected that within a few years it will no longer exist. This exemption will not be extended to other technologies.<br><br>For equipment which is clearly designed or intended for use by young children, the limits of EN 71-1 apply. | | N/A |
| | **Zx.2 Equipment requirements**<br>No safety provision is required for equipment that complies with the following:<br>equipment provided as a package (personal music player with its listening device), where the acoustic output LAeq,T is ≤ 85 dBA measured while playing the fixed “programme simulation noise” as described in EN 50332-1; and<br>a personal music player provided with an analogue electrical output socket for a listening device, where the electrical output is ≤ 27 mV measured as described in EN 50332-2, while playing the fixed “programme simulation noise” as described in EN 50332-1.<br>NOTE 1 Wherever the term acoustic output is used in this clause, the 30 s A-weighted equivalent sound pressure level LAeq,T is meant. See also Zx.5 and Annex Zx.<br><br>All other equipment shall:<br>a) protect the user from unintentional acoustic outputs exceeding those mentioned above; and<br>b) have a standard acoustic output level not exceeding those mentioned above, and automatically return to an output level not exceeding those mentioned above when the power is switched off; and | | N/A |

| IEC 60950-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |

| IEC 60950-1, GROUP DIFFERENCES (CENELEC common modifications EN) | | | |
|---|---|---|---|
| | c) provide a means to actively inform the user of the increased sound pressure when the equipment is operated with an acoustic output exceeding those mentioned above. Any means used shall be acknowledged by the user before activating a mode of operation which allows for an acoustic output exceeding those mentioned above. The acknowledgement does not need to be repeated more than once every 20 h of cumulative listening time; and<br>NOTE 2 Examples of means include visual or audible signals. Action from the user is always required.<br>NOTE 3 The 20 h listening time is the accumulative listening time, independent how often and how long the personal music player has been switched off.<br>d) have a warning as specified in Zx.3; and<br>e) not exceed the following:<br>1) equipment provided as a package (player with Its listening device), the acoustic output shall be ≤ 100 dBA measured while playing the fixed “programme simulation noise” described in EN 50332-1; and<br>2) a personal music player provided with an analogue electrical output socket for a listening device, the electrical output shall be ≤ 150 mV measured as described in EN 50332-2, while playing the fixed “programme simulation noise” described in EN 50332-1.<br><br>For music where the average sound pressure (long term LAeq,T) measured over the duration of the song is lower than the average produced by the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA. In this case T becomes the duration of the song.<br>NOTE 4 Classical music typically has an average sound pressure (long term LAeq,T) which is much lower than the average programme simulation noise. Therefore, if the player is capable to analyse the song and compare it with the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA.<br>For example, if the player is set with the programme simulation noise to 85 dBA, but the average music level of the song is only 65 dBA, there is no need to give a warning or ask an acknowledgement as long as the average sound level of the song is not above the basic limit of 85 dBA. | | N/A |

| IEC 60950-1, GROUP DIFFERENCES (CENELEC common modifications EN) | | | |
|---|---|---|---|
| | **Zx.3 Warning**<br>The warning shall be placed on the equipment, or on the packaging, or in the instruction manual and shall consist of the following:<br>the symbol of Figure 1 with a minimum height of 5 mm; and<br>the following wording, or similar:<br><br>"To prevent possible hearing damage, do not listen at high volume levels for long periods."<br><br>  <br>**Figure 1 – Warning label (IEC 60417-6044)**<br><br>Alternatively, the entire warning may be given through the equipment display during use, when the user is asked to acknowledge activation of the higher level. | | N/A |
| | **Zx.4 Requirements for listening devices (headphones and earphones)** | | N/A |
| | **Zx.4.1 Wired listening devices with analogue input**<br>With 94 dBA sound pressure output LAeq,T, the input voltage of the fixed "programme simulation noise" described in EN 50332-2 shall be ≥ 75 mV.<br><br>This requirement is applicable in any mode where the headphones can operate (active or passive), including any available setting (for example built-in volume level control).<br><br>NOTE The values of 94 dBA – 75 mV correspond with 85dBA – 27 mV and 100 dBA – 150 mV. | | N/A |

| IEC 60950-1 | | | |
|---|---|---|---|
| Clause | Requirement + Test | Result - Remark | Verdict |

| IEC 60950-1, GROUP DIFFERENCES (CENELEC common modifications EN) | | | |
|---|---|---|---|
| | **Zx.4.2 Wired listening devices with digital input**<br>With any playing device playing the fixed "programme simulation noise" described in EN 50332-1 (and respecting the digital interface standards, where a digital interface standard exists that specifies the equivalent acoustic level), the acoustic output LAeq,T of the listening device shall be ≤ 100 dBA.<br><br>This requirement is applicable in any mode where the headphones can operate, including any available setting (for example built-in volume level control, additional sound feature like equalization, etc.).<br><br>NOTE An example of a wired listening device with digital input is a USB headphone. | | N/A |
| | **Zx.4.3 Wireless listening devices**<br>In wireless mode:<br>with any playing and transmitting device playing the fixed programme simulation noise described in EN 50332-1; and<br>respecting the wireless transmission standards, where an air interface standard exists that specifies the equivalent acoustic level; and<br>with volume and sound settings in the listening device (for example built-in volume level control, additional sound feature like equalization, etc.) set to the combination of positions that maximize the measured acoustic output for the abovementioned programme simulation noise, the acoustic output LAeq,T of the listening device shall be ≤ 100 dBA.<br><br>NOTE An example of a wireless listening device is a Bluetooth headphone. | | N/A |
| | **Zx.5 Measurement methods**<br>Measurements shall be made in accordance with EN 50332-1 or EN 50332-2 as applicable. Unless stated otherwise, the time interval T shall be 30 s.<br><br>NOTE Test method for wireless equipment provided without listening device should be defined. | | N/A |

| IEC 60950-1 | | | |
|---|---|---|---|
