

# **Safety Test Report**

Report No.: AGC01881181101ES01

**PRODUCT DESIGNATION**: Bamboo X speaker

BRAND NAME : N/A

**MODEL NAME** : P328.00X, M1

CLIENT : Xindao B.V.

**DATE OF ISSUE** : Nov. 13, 2018

**STANDARD(S)** : EN 60065: 2014

**REPORT VERSION:** : V1.0

# Attestation of Global Compliance (Shenzhen) Co., Ltd.

#### **CAUTION:**

This report shall not be reproduced except in full without the written permission of the test laboratory and shall not be quoted out of context.

The results spound this jest report refer only to the sample(s) tested unless otherwise stated and the sample(s) are retained for 30 days only. The document is issued by XOC, this document cannot be reproduced except in full with our prior written permission. The more details and the authenticity of the report will be confirmed at a training and the sample (s) are retained for 30 days only. Test Report Form/blank test report

Test Report Form No...... AGC60065A6

TRF originator. ..... AGC

Master TRF ...... 2018-09

Test item

Product designation ...... Bamboo X speaker

Brand name..... N/A

Test model ...... P328.00X

Seris model ..... M1

Rating(s)...... 5V===, 0.5A

Test item particulars

Classification of installation and use ...... Moveable apparatus

Supply Connection ...... Supplied by an USB cable

Degree of protection against ingress of dust and liquid.....: IPX0

Test case verdicts

Test case does not apply to the test object ...... N (/A)

Test item does meet the requirement ...... P(ass)

Test item does not meet the requirement ...... F(ail

**Testing** 

Date of receipt of test item...... Nov. 02, 2018

**Attachments** 

Attachment A ...... Photos of product

#### General remarks

This report shall not be reproduced except in full without the written approval of the testing laboratory.

The test results presented in this report relate only to the item tested.

"(See remark #)" refers to a remark appended to the report.

"(See appended table)" refers to a table appended to the report.

Throughout this report a comma is used as the decimal separator.

V1.0	/	Nov. 13, 2018	Valid	Initial release

The results spowning this jest report refer only to the sample(s) tested unless otherwise stated and the sample(s) are retained for 30 days only. The document is issued by AGC, this document cannot be reproduced except in full with our prior written permission. The more details and the authenticity of the report will be confirmed at attractive www.agc.gott.com.

Page 4 of 43

#### **General product informations**

The product be tested supplied via an micro-B USB port, and built-in a Li-polymer rechargeable battery (3.7V, 1500mAh), Which is considered a movable apparatus, and for dry loction used only.

All the models are identical except for model name.

The product was submitted and tested for use at the manufacturer's recommended ambient temperature (Tma) of 35°C.

#### Summary of testing

The test item passsed.

#### Copy of marking plates

Bamboo X speaker

Model: P328.00X

Rating: 5V --- 0.5A

Xindao B.V.

P.O. Box 3082, 2280 GB, Rijswijk, The Netherlands

Importer: xxxx Address: xxxx

Made In China

#### Remark:

- 1) The CE marking and WEEE symbol (if any) should be at least 5mm and 7mm respectively in height.
- 2) The markings and instructions are the minimum requirements required by safety standard. For final production samples, the additional markings which do not give rise to misunderstanding may be added.
- 3) As declared by the manufacturer, the importer (and manufacturer, if it is different)'s name, registered trade name or mark and the postal address will be marked on the products before being place on the market.
- 4) Marking on the packaging or in a document accompanying the electrical equipment is only acceptable if it is not possible to place such markings on the product.

The results spowed this jest report refer only to the sample(s) tested unless otherwise stated and the sample(s) are retained for 30 days only. The document is issued by 40°C, this document cannot be reproduced except in full with our prior written permission. The more details and the authenticity of the report will be confirmed at attp://www.ago.go.tt.com.

Clause	Requirement – Test	Result - Remark	Verdic
6 Figures	Hazardous radiations	60	N
	Replace the entire subclause by the following: Apparatus including a potential source of ionizing radiation shall be so constructed that personal protection against ionizing radiation is provided under normal operating conditions and under fault conditions.  Compliance is checked by measurement under the following conditions:  In addition to the normal operating conditions, all controls adjustable from the outside BY HAND, by any object such as a tool or a coin, and those internal adjustments or pre-sets which are not locked in a reliable manner, are adjusted so as to give maximum radiation whilst maintaining an intelligible picture for 1 h, at the end of which the measurement is made.  NOTE 1 Soldered joints and paint lockings are examples of adequate locking. The dose-rate is determined by means of a radiation monitor with an effective area of 10 cm², at any point 10 cm from the outer surface of the apparatus  Moreover, the measurement shall be made under fault conditions causing an increase of the high-voltage, provided an intelligible picture is maintained for 1 h, at the end of which the measurement is made.  The dose-rate shall not exceed 1 µSv/h (0,1 mR/h) taking account of the background level.  NOTE 2 These values appear in Council Directive 96/29/Euratom of 13 May 1996. A picture is considered to be intelligible if the following conditions are met:  - a scanning amplitude of at least 70 % of the usable screen width; - a minimum luminance of 50 cd/m² with locked blank raster provided by a test generator; - a horizontal resolution corresponding to at least 1,5 MHz in the centre, with a similar vertical degradation; - not more than one flashover per 5 min.
