- Remarks:**
- 1.If a SVHC found over 0.1%, client is suggested to identify the component which contains the SVHC and the exact concentration of the SVHC by requesting further quantitative analysis from the laboratory.
 2. According to the specified scope and analytical technique concentrations of all 151 SVHC are less than 0.1% in the submitted sample(s).
 3. The report limit = Results below this value will be stated as N.D.
 4. As specified by client, the submitted samples were mixed to test.

Note: - N.D.=Not Detected (<report limit)

-0.1%=1000mg/kg

-①: In view of the substances are established as UVCB substances(substances of unknown or variable composition, complex reaction products or biological materials) consisting of different and variable constituents, the test results are calculated based on the main constituents of the representative compounds
