

# CE-LVD TEST REPORT

Prepared for:

Product: 5000 mAh notebook with wireless charging, black

**Trade Name:** 

Model Name: P772.51

Date of Test: Sep. 10, 2019 to Nov. 18, 2019

Date of Report: Nov. 18, 2019

Report Number: U01501191111033-1E

Prepared By : Shen Zhen UONE Test Co., LTD.

Signed for and on behalf of Shen Zhen UONE Test Co., LTD.

#### TEST REPORT IEC 62368-1

# Audio/video, information and communication technology equipment Part 1: Safety requirements

Report Number.....: HK1909022180-SR

Date of issue...... 2019-09-18

Total number of pages.....: 63

Applicant's name.....:

Address....:

Test specification:

Standard ...... EN 62368-1:2014+A11:2017

Test procedure.....: CE-LVD

Non-standard test method .....: N/A

Test Report Form No. .....: IEC62368\_1B

Test Report Form(s) Originator ....: UL(US)

Master TRF...... 2014-03

TEST ITEM PARTICULARS:	
Classification of use by:	☑person ☐Instructed person ☐Skilled person ☐Children likely to be present
Supply Connection:	□AC Mains □DC Mains ☑External Circuit - not Mains connected - ☑ES1 □ES2 □ES3
Supply % Tolerance:	□+10%/-10% □+20%/-15% □+%/% None ☑ None
Supply Connection – Type:	□pluggable equipment type A - □non-detachable supply cord □appliance coupler □direct plug-in mating connector □pluggable equipment type B - □non-detachable supply cord □appliance coupler □permanent connection □mating connector ☑other:
Considered current rating of protective device as part of building or equipment installation	A; Installation location: □building; □equipment
Equipment mobility:	☑movable □hand-held □transportable □stationary □for building-in □direct plug-in □rack-mounting □wall-mounted
Over voltage category (OVC):	□OVC I □OVC II □OVC III □OVC IV ☑other:
Class of equipment	□Class II □Class III
Access location	□restricted access location ☑N/A
Pollution degree (PD):	□PD 1
Manufacturer's specified maxium operating ambient :	<u>25</u> °C
IP protection class	☑IPX0 □IP_
Power Systems:	☑TN □TT □ITV <sub>L-L</sub>
Altitude during operation (m)	☑2000 m or less □m

Query Password: QW0152 Report No.: U01501191111033-1E Date: Nov. 18, 2019 Page 6 of 63

Altitude of test laboratory (m)	☑2000 m or less □m
Mass of equipment (kg)	☑ <u>0.25</u> kg
POSSIBLE TEST CASE VERDICTS:	
- test case does not apply to the test object	: N/A
- test object does meet the requirement:	P (Pass)
- test object does not meet the requirement	: F (Fail)
GENERAL REMARKS:	2012, 2012
The related applicable OSM decisions have been cor	to the report.  sused as the decimal separator.  sidered and the quirements found fulfilled
Determination of the test result includes consideration and methods.	n of measurement uncertainty from the test equipment
Manufacturer's Declaration per sub-clause 4.2.5 o	f IECEE 02:
The application for obtaining a CB Test Certificate includes more than one factory location and a declaration from the Manufacturer stating that the sample(s) submitted for evaluation is (are) representative of the products from each factory has been provided	□Yes ☑Not applicable
When differences exist; they shall be identified in	the General product information section.
Name and address of factory (ies)	: Same as applicant
GENERAL PRODUCT INFORMATION:	
Product Description –  The product is 5000 mAh notebook with wireless charcomponents mounted on PCB, external enclosure is product.	
This product is only available for certified power supp	lies.
Maximum recommended ambient (Tmra): 25°C	OHE JOHE JOHE JOHE JOHE JOH
Model Differences – N/A	
Additional application considerations – (Consider N/A	rations used to test a component or sub-assembly) –

IEC 62368-1						
Clause	Requirement + Test	Result - Remark	Verdict			

4	GENERAL REQUIREMENTS					
4.1.1	Acceptance of materials, components and subassemblies	Components which are certified to IEC and/or national standards are used correctly within their ratings. Components not covered by IEC standards are tested under the conditions present in the equipment.	JOHE			
4.1.2	Use of components	See table 4.1.2	11P			
4.1.3	Equipment design and construction	No accessible part which could cause injury	P			
4.1.15	Markings and instructions:	(See Annex F)	11/P			
4.4.4	Safeguard robustness	See below	Р			
4.4.4.2	Steady force tests	(See Annex T.4, T.5)	N/A			
4.4.4.3	Drop tests	(See Annex T.7)	P			
4.4.4.4	Impact tests:	(See Annex T.6)	N/A			
4.4.4.5	Internal accessible safeguard enclosure and barrier tests:	No internal enclosure.	N/A			
4.4.4.6	Glass Impact tests	No such glass used.	N/A			
4.4.4.74	Thermoplastic material tests:	(See Annex T.8)	IIP			
4.4.4.8	Air comprising a safeguard:	(See Annex T)	N/A			

This report is valid only with a valid digital signature. The digital signature may be available only under the Adobe software above version 7.0.

4.4.4.9	Accessibility and safeguard effectiveness	After test, all safeguard remains effective, No damaged	NP.
4.5	Explosion	No explosion	Р
4.6	Fixing of conductors	2 2 2 2	N/A
4.6.1	Fix conductors not to defeat a safeguard	ONE ONE ONE ONE	N/A
4.6.2	10 N force test applied to:		N/A
4.7	Equipment for direct insertion into mains socket - outlets	THO SE SE SE	N/A
4.7.2	Mains plug part complies with the relevant standard:		N/A
4.7.3	Torque (Nm):		N/A
4.8	Products containing coin/button cell batteries	No lithium coin/button cell battery	N/A
4.8.2	Instructional safeguard	THE THE THE THE	N/A
4.8.3	Battery Compartment Construction	10, 10, 10,	N/A
ONE	Means to reduce the possibility of children removing the battery:	The sile sile sile	_
4.8.4	Battery Compartment Mechanical Tests:	(See Table 4.8.4)	N/A
4.8.5	Battery Accessibility	4. 4. 4. 4	N/A
4.9	Likelihood of fire or shock due to entry of conductive object:	(See Annex P)	N/A

5	ELECTRICALLY-CAUSED INJURY		
5.2.1	Electrical energy source classifications	: (See appended table 5.2)	Р
5.2.2	ES1, ES2 and ES3 limits	ES1	Р
5.2.2.2	Steady-state voltage and current	: 5VDC	I)P
5.2.2.3	Capacitance limits	6 6 6 6	N/A
5.2.2.4	Single pulse limits	: No such single pulses with the EUT	N/A
5.2.2.5	Limits for repetitive pulses	: No such repetitive pulses with the EUT	N/A
5.2.2.6	Ringing signals	: No such ringing signals with the EUT	N/A
5.2.2.7	Audio signals	. : No such audio signals with the EUT	N/A
5.3	Protection against electrical energy sources	(FO), (FO), (FO), (FO)	Р
5.3.1	General Requirements for accessible parts to ordinary, instructed and skilled persons	See below.	P

#### Supplementary Information:

#### Notes:

- [1] Supply voltage is the anticipated maximum Touch Voltage
- [2] Earthed neutral conductor [Voltage differences less than 1% or more]
- [3] Specify method used for measurement as described in IEC 60990 sub-clause 4.3
- [4] IEC60990, sub-clause 6.2.2.7, Fault 7 not applicable.
- [5] (\*) IEC60990, sub-clause 6.2.2.2 is not applicable if switch or disconnect device (e.g., appliance coupler) provided.

6.2.2	Та	ble: Electrical	or classification	10 M	N/A		
Source Description		Measurement	Max Power after 3 s	Max Power after 5 s*)	PS Classification		
10 PM	101	10/4	Power (W) :	1011 1011	10/4 -10/4	10 by	10/4
	0		V <sub>A</sub> (V) :	0 0	0 _0	0	
all	d	i alli	I <sub>A</sub> (A) :	all all	- NE - NE	de	NE

#### Supplementary Information:

(\*) Measurement taken only when limits at 3 seconds exceed PS1 limits

6.2.3.1 Table: Determination	n of Potential Ign	ition Sources (Arc	ing PIS)	N/A
Location	Open circuit voltage After 3 s (Vp)	Measured r.m.s current (Irms)	Calculated value (V <sub>p</sub> x I <sub>rms</sub> )	Arcing PIS? Yes / No
10 Hr. 10 Hr. 10 Hr. 10	AL JOHN	OHL JOHL	10 Hr. 10 Hr.	10 Hr. 10 Hr.

#### Supplementary information:

An Arcing PIS requires a minimum of 50 V (peak) a.c. or d.c. An Arcing PIS is established when the product of the open circuit voltage ( $V_p$ ) and normal operating condition rms current ( $I_{rms}$ ) is greater than 15.

6.2.3.2 Table: Determination of Potential Ignition Sources (Resistive PIS)								
Circuit Location (x-y)	Operating Condition (Normal / Describe Single Fault)	Measured wattage or VA During first 30 s (W / VA)	Measured wattage or VA After 30 s (W / VA)	Protective Circuit, Regulator, or PTC Operated? Yes / No (Comment)	Resistive PIS? Yes/No			
10HF 10HF 110H	1011 1011	10/11/1	2Hr 10Hr	10/11/10/11/	10/1/2			

#### Supplementary Information:

A combination of voltmeter, VA and ammeter IA may be used instead of a wattmeter.

If a separate voltmeter and ammeter are used, the product of (VA x IA) is used to determine Resistive PIS classification.

A Resistive PIS: (a) dissipates more than 15 W, measured after 30 s of normal operation, <u>or</u> (b) under single fault conditions has either a power exceeding 100 W measured immediately after the introduction of the fault if electronic circuits, regulators or PTC devices are used, or has an available power exceeding 15 W measured 30 s after introduction of the fault.

4.Z1	Add the following new subclause after 4.9:				N/A
	To protect against excessive current, short-circuits and earth faults in circuits connected to an a.c. <b>mains</b> , protective devices shall be included either as integral parts of the equipment or as parts of the building installation, subject to the following, a), b) and c):				JOHE
	a) except as detailed in b) and c), protective devices necessary to comply with the requirements of B.3.1 and B.4 shall be included as parts of the equipment;				1012
	b) for components in series with the mains input to the equipment such as the supply cord, appliance coupler, r.f.i. filter and switch, short-circuit and earth fault protection may be provided by protective devices in the building installation;				110Mir
	c) it is permitted for <b>pluggable equipment type B</b> or <b>permanently connected equipment</b> , to rely on dedicated overcurrent and short-circuit protection in the building installation, provided that the means of protection, e.g. fuses or circuit breakers, is fully specified in the installation instructions.				JOHE
	If reliance is placed on protection in the building installation, the installation instructions shall so state, except that for <b>pluggable equipment type A</b> the building installation shall be regarded as providing protection in accordance with the rating of the wall socket outlet.				JOHE
5.4.2.3.2.4	Add the following to the end of this subclause: The requirement for interconnection with external circuit is in addition given in EN 50491-3:2009.	ONE	ONE	ONE	N/A
10.2.1	Add the following to <sup>c)</sup> and <sup>d)</sup> in table 39: For additional requirements, see 10.5.1.	3	N. S.	.(4)	N/A

01, 01, 01, 01, 01, 01,	Ol	OL	01.	01.
Add the following after the first paragraph:				N/A
For RS 1 compliance is checked by measurement under the following conditions:				ONE
In addition to the normal operating conditions, all controls adjustable from the outside by hand, by any object such as a tool or a coin, and those internal adjustments or presets which are not locked in a reliable manner, are adjusted so as to give maximum radiation whilst maintaining an intelligible picture for 1 h, at the end of which the measurement is made.				10 ME
NOTE Z1 Soldered joints and paint lockings are examples of adequate locking.				IONE
The dose-rate is determined by means of a radiation monitor with an effective area of 10 cm², at any point 10 cm from the outer surface of the apparatus.				7
Moreover, the measurement shall be made under fault conditions causing an increase of the high-voltage, provided an intelligible picture is maintained for 1 h, at the end of which the measurement is made.				ONE
For RS1, the dose-rate shall not exceed 1 μSv/h taking account of the background level.				0
NOTE Z2 These values appear in Directive 96/29/Euratom of 13 May 1996.				1011
Add the following paragraph to the end of the subclause:	.4.	.4.	4.	N/A
EN 71-1:2011, 4.20 and the related tests methods and measurement distances apply.				POWE
Add the following new subclause after 10.6.5.	4	4		N/A
10.Z1 Non-ionizing radiation from radio frequencies in the range 0 to 300 GHz				POWE
The amount of non-ionizing radiation is regulated by European Council Recommendation 1999/519/EC of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0 Hz to 300 GHz).				JOHE
For intentional radiators, ICNIRP guidelines should be taken into account for Limiting Exposure to Time-Varying Electric, Magnetic, and Electromagnetic Fields (up to 300 GHz). For hand-held and body-mounted devices, attention is drawn to EN 50360 and EN 50566				JOHE
Add the following note:  NOTE Z1 The harmonized code designations corresponding to the	JOHN	AOM	AOUR	N/A

	IEC 61643-311 NOTE Harmonized as EN 61643-311.	
	IEC 61643-321 NOTE Harmonized as EN 61643-321.	
	IEC 61643-331 NOTE Harmonized as EN 61643-331.	1
ZB	ANNEX ZB, SPECIAL NATIONAL CONDITIONS (EN)	N/A
4.1.15	Denmark, Finland, Norway and Sweden	N/A
	To the end of the subclause the following is added:	all
	Class I pluggable equipment type A intended for connection to other equipment or a network shall, if safety relies on connection to reliable earthing or if surge suppressors are connected between the network terminals and accessible parts, have a marking stating that the equipment shall be connected to an earthed mains socket-outlet.	JOHE
	The marking text in the applicable countries shall be as follows:	4.
	In <b>Denmark</b> : "Apparatets stikprop skal tilsluttes en stikkontakt med jord som giver forbindelse til stikproppens jord."  In <b>Finland</b> : "Laite on liitettävä suojakoskettimilla varustettuun pistorasiaan"	110ME
	In <b>Norway</b> : "Apparatet må tilkoples jordet stikkontakt" In	
	Sweden: "Apparaten skall anslutas till jordat uttag"	JE.
4.7.3	United Kingdom	N/A
	To the end of the subclause the following is added:	
	The torque test is performed using a socket-outlet complying with BS 1363, and the plug part shall be assessed to the relevant clauses of BS 1363. Also see Annex G.4.2 of this annex	JOHE
5.2.2.2	Denmark	N/A
	After the 2nd paragraph add the following:	110,
	A warning (marking <b>safeguard</b> ) for high <b>touch current</b> is required if the <b>touch current</b> exceeds the limits of 3,5 mA a.c. or 10 mA d.c.	ONE

This report is valid only with a valid digital signature. The digital signature may be available only under the Adobe software above version 7.0.

5.4.11.1 and	Finland and Sweden			N/A
Annex G	To the end of the subclause the following is added:	4-		1
	For separation of the telecommunication network from earth th following is applicable:	е		ONE
	If this insulation is solid, including insulation forming part of a component, it shall at least consist of either	30		JE.
	two layers of thin sheet material, each of which shall pass the electric strength test below, or	24		10 L
	• one layer having a distance through insulation of at least 0,4 mm, which shall pass the electric strength test below.	32		ME
	If this insulation forms part of a semiconductor component (e.g an optocoupler), there is no distance through insulation requirement for the insulation consisting of an insulating compound completely filling the casing, so that clearances and creepage distances do not exist, if the component passes the electric strength test in accordance with the compliance clause	t		110,
	below and in addition	4.		4.
	• passes the tests and inspection criteria of 5.4.8 with an electric strength test of 1,5 kV multiplied by 1,6 (the electric strength test of 5.4.9 shall be performed using 1,5 kV), and	28		10 Mil
	• is subject to routine testing for electric strength during manufacturing, using a test voltage of 1,5kV.	2 High		. IONE
	It is permitted to bridge this insulation with a capacitor complying with EN 60384-14:2005, subclass Y2.	4		
	A capacitor classified Y3 according to EN 60384- 14:2005, may bridge this insulation under the following conditions:	24		10 Miles
	• the insulation requirements are satisfied by having a capacitor classified Y3 as defined by EN 60384-14, which in addition to the Y3 testing, is tested with an impulse test of 2,5 kV defined in 5.4.11;	7 Mic		JOHE
	the additional testing shall be performed on all the test specimens as described in EN 60384-14;	JE.		all.
	the impulse test of 2,5 kV is to be performed before the endurance test in EN 60384-14, in the sequence of tests as described in EN 60384-14.	2,		10.

5.5.2.1	Norway	-	- 0		N/A
	After the 3rd paragraph the following is added:				SE
	Due to the IT power system used, capacitors are required to be rated for the applicable line-to-line voltage (230 V).				1012
5.5.6	Finland, Norway and Sweden	·0/8/	· 0 1/2 1/2	OB	N/A
	To the end of the subclause the following is added:				120
	Resistors used as <b>basic safeguard</b> or bridging <b>basic insulation</b> in <b>class I pluggable equipment type A</b> shall comply with G.10.1 and the test of G.10.2.				JOHE
5.6.1	Denmark				N/A
	Add to the end of the subclause				1
	Due to many existing installations where the socket- outlets can be protected with fuses with higher rating than the rating of the socket-outlets the protection for pluggable equipment type A shall be an integral part of the equipment.				JOHE
	Justification: In Denmark an existing 13 A socket outlet can be protected by a 20 A fuse.				ONE
5.6.4.2.1	Ireland and United Kingdom	0	0	0	N/A
	After the indent for <b>pluggable equipment type A</b> , the following is added:  — the <b>protective current rating</b> is taken to be 13 A, this being the largest rating of fuse used in the <b>mains</b> plug.				JOHE
5.6.5.1	To the second paragraph the following is added:	1/2	4	1/2	N/A
3.0.3.1	The range of conductor sizes of flexible cords to be accepted by terminals for equipment with a rated current over 10 A and up to and including 13 A is: 1,25 mm² to 1,5 mm² in cross-sectional area.				JOHE
5.7.5	Denmark	9	V	V	N/A
	To the end of the subclause the following is added:				16
	The installation instruction shall be affixed to the equipment if the <b>protective conductor current</b> exceeds the limits of 3,5 mA a.c. or 10 mA d.c.				10 p.

7.6.1	Norway and Sweden		1	N/A
	To the end of the subclause the following is added:		1	1.
	The screen of the television distribution system is normally not earthed at the entrance of the building and there is normally no equipotential bonding system within the building. Therefore the protective earthing of the building installation needs to be isolated from the screen of a cable distribution system.		10/1/1	10ME
	It is however accepted to provide the insulation external to the equipment by an adapter or an interconnection cable with galvanic isolator, which may be provided by a retailer, for example.		JOHE	JOHE
	The user manual shall then have the following or similar information in Norwegian and Swedish language respectively, depending on in what country the equipment is intended to be used in:			>
	"Apparatus connected to the protective earthing of the building installation through the mains connection or through other apparatus with a connection to protective earthing – and to a television distribution system using coaxial cable, may in some circumstances create a fire		JOHE	JOHE
	hazard. Connection to a television distribution system therefore has to be provided through a device providing electrical isolation below a certain frequency range (galvanic isolator, see EN 60728-11)"		JOHE	JOHE
	NOTE In Norway, due to regulation for CATV-installations, and in Sweden, a galvanic isolator shall provide electrical insulation below 5 MHz. The insulation shall withstand a dielectric strength of 1,5 kV r.m.s., 50 Hz or 60 Hz, for 1 min.		JOHE	OWE
	Translation to Norwegian (the Swedish text will also be accepted in Norway):		JOHE	ONE
	"Apparater som er koplet til beskyttelsesjord via nettplugg og/eller via annet jordtilkoplet utstyr – og er tilkoplet et koaksialbasert kabel-TV nett, kan forårsake brannfare. For å unngå dette skal det ved tilkopling av apparater til kabel-TV nett installeres en galvanisk isolator mellom apparatet og kabel-TV nettet."		JONE	JOHE
	Translation to Swedish:		10/2	1019
	"Apparater som är kopplad till skyddsjord via jordat vägguttag och/eller via annan utrustning och samtidigt är kopplad till kabel-TV nät kan i vissa fall medföra risk för brand. För att undvika detta skall vid anslutning av apparaten till kabel-TV nät galvanisk isolator finnas mellan apparaten och kabel-TV nätet."		JOHE	JONE

5.7.6.2	Denmark				N/A
	To the end of the subclause the following is added:				
	The warning (marking safeguard) for high touch current is required if the touch current or the protective current exceed the limits of 3,5 mA.				JOHE
B.3.1 and	Ireland and United Kingdom	all.	4	1/2	N/A
B.4	The following is applicable:				101
	To protect against excessive currents and short-circuits in the primary circuit of <b>direct plug-in equipment</b> , tests according to Annexes B.3.1 and B.4 shall be conducted using an external miniature circuit breaker complying with EN 60898-1, Type B, rated 32A. If the equipment does not pass these tests, suitable protective devices shall be included as an integral part of the <b>direct plug-in equipment</b> , until the requirements of Annexes B.3.1 and B.4 are met				JOHE
G.4.2	Denmark	- UE	all.	de	N/A
	To the end of the subclause the following is added:				10,
	Supply cords of single phase appliances having a rated current not exceeding 13 A shall be provided with a plug according to DS 60884-2-D1:2011.  CLASS I EQUIPMENT provided with socket-outlets with earth contacts or which are intended to be used in locations where protection against indirect contact is required according to the				JONE
	wiring rules shall be provided with a plug in accordance with standard sheet DK 2-1a or DK 2-5a.				101-
	If a single-phase equipment having a RATED CURRENT exceeding 13 A or if a poly-phase equipment is provided with a supply cord with a plug, this plug shall be in accordance with the standard sheets DK 6-1a in DS 60884-2-D1 or EN 60309-2.				JOHE
	Mains socket outlets intended for providing power to Class II apparatus with a rated current of 2,5 A shall be in accordance DS 60884-2-D1:2011 standard sheet DKA 1-4a.				JOHE
	Other current rating socket outlets shall be in compliance with Standard Sheet DKA 1-3a or DKA 1-1c.				JOHE
	Mains socket-outlets with earth shall be in compliance with DS 60884-2-D1:2011 Standard Sheet DK 1-3a, DK 1-1c, DK1-1d, DK 1-5a or DK 1-7a				JONE
	Justification: Heavy Current Regulations, Section 6c				1.

G.4.2	United Kingdom				N/A
	To the end of the subclause the following is added:				4
	The plug part of direct plug-in equipment shall be assessed to BS 1363: Part 1, 12.1, 12.2, 12.3, 12.9, 12.11, 12.12, 12.13, 12.16, and 12.17, except that the test of 12.17 is performed at not less than 125 °C.				OME
	Where the metal earth pin is replaced by an Insulated Shutter Opening Device (ISOD), the requirements of clauses 22.2 and 23 also apply.				JOHE
G.7.1	United Kingdom	16	16	- NE	N/A
	To the first paragraph the following is added:				10,
	Equipment which is fitted with a flexible cable or cord and is designed to be connected to a mains socket conforming to BS 1363 by means of that flexible cable or cord shall be fitted with a 'standard plug' in accordance with the Plugs and Sockets etc (Safety)				7
	Regulations 1994, Statutory Instrument 1994 No. 1768,				1
	unless exempted by those regulations.  NOTE "Standard plug" is defined in SI 1768:1994 and essentially means an approved plug conforming to BS 1363 or an approved conversion plug.				10 kg
G.7.1	Ireland	OBL	OBL	· 01/4/2	N/A
	To the first paragraph the following is added:				110
	Apparatus which is fitted with a flexible cable or cord shall be provided with a plug in accordance with Statutory Instrument 525: 1997, "13 A Plugs and Conversion Adapters for Domestic Use Regulations: 1997. S.I. 525 provides for the recognition of a standard				JOHE
	of another Member State which is equivalent to the relevant Irish Standard				JOHE
G.7.2	Ireland and United Kingdom	,		1,61	N/A
	To the first paragraph the following is added:				ME
	A power supply cord with a conductor of 1,25 mm <sup>2</sup> is allowed for equipment which is rated over 10 A and up to and including 13 A.				10.
ZC	ANNEX ZC, NATIONAL DEVIATIONS (EN)	-191		- 47	N/A

10.5.2	Germany		N/A
	The following requirement applies:		2.
	For the operation of any cathode ray tube intended for the display of visual images operating at an acceleration voltage exceeding 40 kV, authorization is		JOHE
	required, or application of type approval (Bauartzulassung) and marking.		ONE
	Justification:		110
	German ministerial decree against ionizing radiation (Röntgenverordnung), in force since 2002-07-01, implementing the European Directive 96/29/EURATOM.		JOHE
